संदर्भ संख्या / Ref. No. 20.12.JCDN.168P
दिनांक / Date : 03.12.13

GSI being premier organization under Union Ministry of Mines, New Delhi has been undertaking multidisciplinary programme in earth sciences and, hence, has acted as the prime provider of basic earth science information to cater to the fast expanding needs of the Government in respect of decision making for policy, commercial, economic and societal needs. Considering national requirements and global trends in terms of technologies, the High Power Committee (HPC) has desired GSI to assume the added responsibilities of forging bilateral co-operation and collaborative exchange programme with stakeholders in all sectors related to Geoscience, state and central Govt. organizations, academic institutions and even with institutions from outside with objective to co-operate and facilitate sharing of geoscientific data available with the related organizations resulting into the integration and synthesis of this valuable data to be used for delivering the public good and sustainable socio-economic development.

In the backdrop of the aforesaid information, the Geoscience Partnership Division, Geological Survey of India, presently stationed and functioning at DGCO, New Delhi does hereby request you to kindly come forward at your earliest convenience with proposals on identified specific projects to partner with GSI embarking upon collaborative programmes in the areas of fundamental and multidisciplinary Geosciences, and special studies including Geotechnical investigation, physical, chemical and biological hazard investigation, climate change geo-studies etc. to pave the way for the best utilization of natural resource assessments and the increased usage of geological knowledge so that the societal needs can be better and effectively addressed leading to improvement in quality of human life. We shall be eagerly waiting for your positive reply to jointly share this opportunity to interact on a common platform and work out strategies for forging bilateral co-operation and collaborative exchange ventures on data sharing, technical expertise, specialized advance laboratory facilities and training in various disciplines of geology.

Yours faithfully,

(Rajeshwer Paul)
Director
Geoscience Partnership Division
