Dear Prof Shevgaonkar

Cabinet had recently approved the National Policy on Universal Electronic Accessibility. This policy recognizes the need to eliminate discrimination on the basis of disabilities and to facilitate equal access to Electronics & ICTs. This policy covers technological aspects including access to Electronics & ICT products, both hardware and software by differently abled persons in the areas of universal design, assistive technology and independent living aids. The policy is proposed to be implemented by creating awareness on universal electronic accessibility and universal design; capacity building and infrastructure development; setting up of model Electronics & ICT centres for providing training and demonstration to special educators, conducting R&D, use of innovation, ideas, technology and developing programmes and schemes with greater emphasis for differently abled women and children etc.

2. Proposals are invited from your Organization/Institute for creating awareness about the policy, to set up ICT training centre, R&D proposal to develop Assistive technology and Independent living aids to encompass accessibility standards and guidelines and universal design concepts for the Electronics and ICTs product development.

3. The proposal may be submitted in the format available at <http://deity.gov.in/content/scheme-forms>.

4. Looking forward for an early proposal from your Institute/Organization.

With regards,

Yours sincerely,

(Dr. Ajay Kumar)
